

How to Make your Treasure Bottle

Clean a small plastic bottle and take the label off.

Gather together 20-30 small items. Pieces of lego, paperclips, stones, beads etc are all examples of good items to use. Keep a note of the items.

You can list the items for people to find or just tell them how many they have to find and get them to list them.

Carefully fill your bottle with rice and add some items as you go along.

You can dye the rice if you want to. Mix it with food dye, spread it out and make sure it's thoroughly dry before you use it.

Tape the lid onto the bottle. You can use stickers to decorate the bottle too.

If you want to make the hunt harder you can cut a slot into some paper and attach it around the bottle so that there is only a small window to search for the treasure.
