

How to Make your Rocking Boat

Colour your fish, sails and boat and add any designs you like.

Put a design on your flag. You could put your name or a picture of you.

Fold the paper plate in half. It works best with the shiny side inside.

Cut the blue paper into strips and

Glue your boat onto the centre half of the plate so that the top of the deck sits along the fold and the cabin is above the plate.

Glue the blue waves onto the bottom of the plate so that all the white is covered. Cut out your seaweed, fish and shells and glue them amongst the waves.

Get an adult to make a small cut in the middle of the plate fold and push the stick mast through it and secure it with tape.

Now glue your sail and flag onto the mast. Fold the edge of the flag around the mast.

If you make a submarine the method is the same but without a sail or flag - they would get a bit soggy underwater!
